The way people dress is important in our life because it shows people's different interests. The difference between fashion and style is big. Fashion is something popular in society, something that everyone wears. Style is something that every person have. Every style is unique. My wardrobe is similliar to people my age. Teenagers ofte wear sneackers and T-shirts because it's comforting and casual. My favourite style is the casual one.

I think every person should have their own style but still follow fashion trends becaus it's interesting to see how ~~person's interests~~ clothes shows person's interests.
