Personally, I can say that there is a deep meaning in these ~~Aristotle~~ Aristotle's wise words. I think that philosopher meant that studying and learning is very hard but in the future things that you have learnt at school or university will be usefull. A lot of students think that knowledge they get at school would be useless for them and I think they are wrong at this point.

In my opinion, Aristotle was totally right and I agree with him. School education is one of the most important things in people's life. Without school education you will not join university and without university education you will not ~~join~~ get the job you want. If you want to live in comfort you have to accept the rules of life and work hard everyday to achieve your dreams and goals.

I would like to give you some examples from history of my point of view. Vladimir Putin was an ordinary boy who was just studying hard and running through his problems. Step by step that boy ~~became~~ became a leader of one of the biggest countries of our planet. This example shows us a necessity of education.

In conclusion, I would like to say that education is necessary in every aspect of our life. Also, the quotation of Aristotle is absolutely right.
